## TEST DURATION:

The test duration in minutes (minimum) for the above tests is as per the standard API 598 & BS 6755 part-1

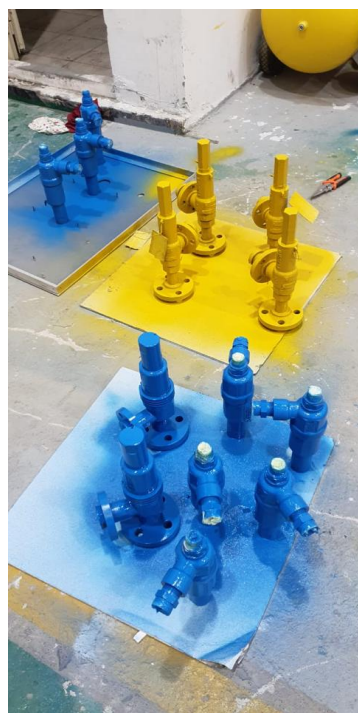

## PAINTING:

After the completion of testing if the valve passes through all tests and meets all requirements as per the above referred standard, will be taken for painting. Aluminum paint is to be painted on Carbon steel. Alloy steel valves. No painting is required for stainless steel valves. All areas are to be painted except stem which cause operational problems like scoring of stem and gland packing and easy closure and opening of valve.

## INSTALLATION:

After completion of inspection at the customers end the valve will be installed by us (if required) on the pipe line.
